Interactive Range of Workshops

Workshops Overview

Our interactive range of training is very different from conventional driver training. It's fast paced and thought-provoking sessions focusing on high-risk aspects of driving involving the use interactive online voting.

Existing customers using our Continuum platform for risk assessments or using telematics to monitor driver behaviour can direct high risk drivers onto specific workshops to target primary causes of a high risk value or poor telematic performance.

New or customers not using the TTC Continuum risk assessment can also make use of these highly interactive sessions to address high risk drivers.

- Speed Management
- Driver Distractions
- Young Driver
  – In Employment

- Driver Fatigue
- Driver Impairment
- Young Driver
  – in Education

Logistics

Online Delivery

For online workshops our preferred option is to use Zoom or Teams and Mentimeter online voting.

In order to facilitate your workshop via our virtual classroom format all attending will need:

A Computer, Laptop or Tablet

(Mobile phones are not suitable to undertake the course due to the size of the screen but are required for the online voting and interaction element of this course.)

All devices must have:

Internet access, web camera, microphone, speakers or headphones, stable internet connection and enough battery charge for at least 3 hours.

In-person Delivery

For real time classroom workshops, we request that clients confirm they have:

- A suitable room is available for up to 16 delegates.
- The ability to project onto a clear white wall.
- Internet access.
