Electric Vehicle eLearning options

Overview

The drive for more sustainable transport is a major priority for many businesses, striving to reduce their carbon footprint, improve air quality and contribute towards slowing climate change.

TTC are supporting existing and new clients making the transition to electric with the release of two new eLearning modules, making impactful and easily accessible training cost effective. Both accessible to customers utilizing our online risk assessment and to new customers just wanting eLearning.

Delivery Options

Electric Vehicle Familiarisation

30
minutes

to complete
for new drivers
to electric

So You Think You Know Your EV?

20
minutes

to complete for
existing drivers
of electric

Content Outline

Electric Vehicle Familiarisation

- Key safety considerations when driving an EV.
- How & where to charge.
- Journey planning, charging speeds & topping up.
- Driving style and impact on range.
- Knowing & using the EV's settings.

So You Think You Know Your EV?

How to achieve maximum possible range from their EV, while considering their and others' safety.

What special precautions an EV driver should adopt to protect vulnerable road users.

Review & Outcomes

- Five question knowledge assessment for each module.
- Auditable trail of module completion.
- Supporting business transitioning to EV.
- Provision of safety training to existing EV drivers through the Continuum platform.

Logistics

To undertake the modules, participants need:

- A computer, laptop, tablet or mobile phone.
- Internet access, speakers or headphones, and a stable connection.
- Email address and access to TTC Continuum learning management.
